

DISCO Protocol

Test Instructions: Manage your event

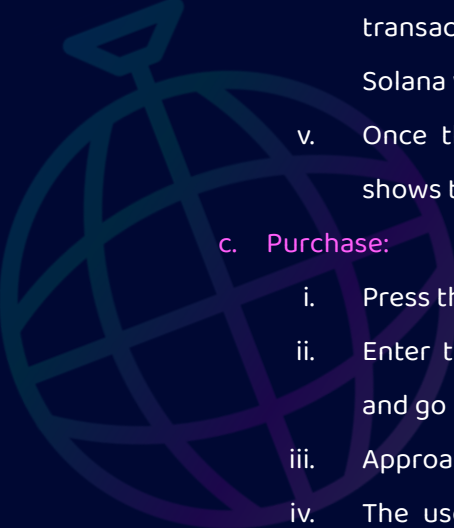

Requirements:

1. Smartphone with Android OS.
2. NFC tag.

Step to step:

1. Download and install DISCO Protocol App on your first Android smartphone from [here](#). This app acts on the event side.
2. Go to the [Events Board](#) and find your created event. On your event's page, click on [Pair with App](#).
3. Scan the QR code with the DISCO Protocol App to sync it with your event.
4. The DISCO Protocol app is configured for your specific event, so now you'll be able to start testing the check in access, recharge tokens and purchase tokens features. Let's go!
 - a. **Check In:**
 - i. Press the Check In button on the home DISCO Protocol App.
 - ii. Approach the wearable device to the back of the phone. This device can be any device with a NFC tag.
 - iii. Once the app reads the ID on the NFC device, the user who is checking in for the event needs to choose and enter a 4-digit password, then they have to confirm the password on the same view.
 - iv. The DISCO Protocol App will show the QR code for the check-in transaction to confirm and wait until the user's approval.
 - v. To approve the check in transaction, the user needs to read the QR code with his Solana wallet.
 - vi. Once the check in transaction is confirmed, the DISCO Protocol app shows the information of the recently activated wearable device.

- b. **Recharge:**

- 
- i. Press the Recharge button on the home DISCO Protocol App.
 - ii. Enter the amount of Disco Tokens to recharge and go to checkout.
 - iii. Approach the wearable device to the back of the phone.
 - iv. The DISCO Protocol App will show a new QR code for the recharge transaction and wait until the user approves by reading the code with his Solana wallet..
 - v. Once the recharge transaction is confirmed, the DISCO Protocol App shows the information of the wearable device with the new balance.

c. **Purchase:**

- i. Press the Purchase button on the home DISCO Protocol App.
- ii. Enter the amount of Disco Tokens to debit from the wearable balance and go to checkout.
- iii. Approach the wearable device to the back of the phone.
- iv. The user that owns the wearable device needs to enter the 4-digits password assigned on the check in process.
- v. The DISCO Protocol App confirms the balance available and executes the purchase transaction.
- vi. After the transaction is completed, the app shows the info of the wearable device with the updated balance.

d. **View Info:**

- i. Long press the View Info button on the home DISCO Protocol App.
- ii. Approach the wearable device to the back of the phone.
- iii. The app will show the current info of the wearable device.

5. Share your experience on [Discord](#).
